OBJECTIVE

I am an aspiring software developer with hands-on experience in ML and web technologies, proficient in Python, Java, Flask, and TensorFlow, with a proven track record of developing solutions such as Surplus2Serve to reduce post-harvest waste and Sehat-Ka-Saathi to streamline healthcare workflows. Seeking to leverage technical skills and innovative problem-solving to develop scalable and socially impactful software systems while advancing expertise in machine learning and full stack development.

EDUCATION

Bachelor of Computer Science, Amity University, Noida Expected 2027
Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, Operating Systems, and Networks.

CBSE Senior School Certificate Examination, Bal Bhavan Public School, Delhi 2021 - 2022
Score: 90%

SKILLS

Technical Skills	Git, SQL/NoSQL databases
Programming Languages	Python, Java, HTML, CSS
Machine Learning Technologies	TensorFlow, PyTorch, Scikit-learn
Frameworks	Flask
Data Visualization	Matplotlib, Seaborn
Soft Skills	Problem Solving, Adaptability, Communication, Time Management

EXPERIENCE

CyberCup Hackathon September 2024
Team Member *Noida, Uttar Pradesh*

- Enhanced responsive frontend components for a cloud-based platform using HTML, CSS under a 24-hour hackathon constraint.
- Collaborated with a cross-functional team of 5 to debug and optimize features, reducing UI load times by 30%.
- Contributed to real-time data visualization modules, improving user navigation and reporting efficiency for end-users.

PROJECTS

Surplus2Serve Developed a web-based platform using Fast API and React to predict spoilage risk in Indian agricultural commodities by integrating environmental, logistic, and commodity-specific factors. Designed a rule-based model and trained ML classifiers (XGBoost, Random Forest) to categorize produce into low/medium/high spoilage risk, achieving 95% accuracy on validation data. Implemented a dashboard for NGOs and supply chains to prioritize food redistribution, reducing post-harvest waste and improving food security. ([Project links available upon request](#))

Sehat-Ka-Saathi Developed an integrated appointment management system to streamline interactions between doctors and patients. ([Project links available upon request](#))

EXTRA-CURRICULAR ACTIVITIES

- Hackathon Competitions:** Led a cross-functional team to strategize and implement innovative solutions within tight deadlines.

- **Clubs and Societies:** Participated in Digital India club as social media team member and currently in TriggerMind club as technical team member.
- **Certifications:** NPTEL Python for Data Science.
